

45 Years Strong

The North American Bison traces its origins to a similar Eurasian bison species which crossed the Bering Strait in prehistoric times. While **Maine Drilling & Blasting** can't claim that kind of longevity, our employees are still mighty proud of our past 45 years. We've persevered, adapted, and grown stronger and smarter, all the while holding true to our founding principles of **hard work, honesty and quality of services**. That's why MD&B is the **Trusted Breed** for so many throughout the Northeast.
