Iroquois Newtown	Newtown CT	2 miles

Maine Drilling & Blasting

FROM MAINE TO VIRGINIA

Successful projects: they're all about having the resources when you need them and working with someone who offers you proven results on demanding schedules. MD&B has remote access capability for almost all terrains. As work progresses, we constantly optimize drill types and explosive options from in-house, local resources. We adapt to special projects with specialized equipment. Pipeline projects also benefit from our additional services such as perforation drilling, ledge probing, and hoeramming. Our support of site-specific environmental compliance and our commitment to safety is second to none.

- 88 Drills
- 7 All-terrain Komatsu Transporters
- 17 All-terrain Vehicles
- 9 Hoe-rams
